

Dental Ceramist

Pay: From \$28.00 per hour (depending on experience and qualifications)

Schedule: 8-hour shift, 40 hours/week (Monday to Friday)

Overview:

The Dental Ceramist plays a crucial role in the fabrication of dental prosthetics and restorations, meticulously crafting ceramic materials to create lifelike dental crowns, bridges, veneers, and other prosthetic components.

Key Responsibilities

- Utilize your artistic skills and technical knowledge to layer ceramic materials onto dental frameworks, ensuring accurate color matching and natural-looking esthetics.
- Apply glazing materials and firing techniques to enhance the surface characteristics of ceramic restorations – achieving optimal shine, texture, and translucency.
- Analyze dental prescriptions and understand the specific requirements outlined by dentists and managers.
- Follow dentist and supervisor specifications for margins, fit, interproximal contacts, occlusion, shade, and shape.
- Collaborate with the Porcelain and Quality Control Departments to deliver high-precision results that meet customer expectations.
- Stay current with advancements in dental materials, techniques, and technologies, and contribute to continuous improvement efforts within the lab.

Qualifications

- Minimum of **3 years** of proven experience as a dental ceramist
- Exceptional attention to detail, color, and contour
- Strong understanding of dental anatomy and restorative techniques
- Ability to work independently and as part of a team
- Experience with digital workflows (CAD/CAM) is a plus
