

Denture Technician

Pay: From \$25.00 per hour (depending on experience and qualifications)

Schedule: 8-hour shift, 40 hours/week (Monday to Friday)

Overview:

The Denture Technician is responsible for fabricating dental prosthetics, primarily dentures, to exacting standards of quality and precision.

Key Responsibilities

- Fabricate complete and partial dentures according to prescription specifications provided by dentists or prosthodontists
- Fabricate ortho appliances (Sports Guards, Essix Retainers, Night Guards, etc.)
- Utilize various materials such as acrylics, resins, and metals to construct dentures, ensuring durability, functionality, and aesthetic appeal
- Flask, process, and trim dental prostheses with precision and care
- Perform adjustments and repairs on existing dentures to optimize patient comfort and fit

Qualifications

- Minimum **3 years** of experience in removable prosthetics
- Strong understanding of dental anatomy and prosthetic design
- Excellent manual dexterity and attention to detail
- Familiarity with ortho appliance fabrication
- Ability to follow detailed prescriptions and meet production deadlines
- Experience with digital denture workflows is an asset
