

Plaster Technician

Pay: From \$23.00 per hour (depending on experience and qualifications)

Schedule: 8-hour shift, 40 hours/week (Monday to Friday)

Overview:

The Plaster Technician will prepare plaster models and moulds in an efficient manner and of an acceptable, consistent quality.

Key Responsibilities

- Pour incoming impressions with accuracy and efficiency
- Manage and prioritize cases based on due dates
- Cut, trim, and articulate poured models
- Use semi-adjustable and metal hinge articulators to ensure proper case setup
- Provide second pours to the Porcelain & Quality Control departments
- Maintain cleanliness and organization in the plaster area
- Collaborate with other departments to ensure timely, high-quality results

Qualifications

- Experience working in a dental laboratory (plaster/model department preferred)
- Strong manual dexterity and attention to detail
- Understanding of dental anatomy and model articulation
- Ability to work independently and manage deadlines
- Knowledge of lab safety and infection control practices
- Experience with digital workflows is a plus
